Background

As part of the Army Research Laboratory's Open Campus Initiative, ARL has established a Center for Adaptive Instructional Sciences (CAIS). The purpose of CAIS is to bring together government, industry, and academia to advance adaptive instructional science and technology for application in training and educational systems through a collaborative, innovative research ecosystem. Adaptive or tailored instruction in the form of Intelligent Tutoring Systems (ITSs) has been shown to be significantly more effective than traditional classroom instruction for both individual learners and teams. While the promise of adaptive instructional tools and methods are high, there remain significant technical challenges to its practical application in large organizations (e.g., US Army, large corporations, and universities).

Collaborative Focus

CAIS is currently focused on identifying and leveraging talent, facilities, and resources across government, industry, and academia to conduct transformative science which enhances capabilities in three broad areas:

- Authoring tools for Adaptive Instructional Systems
- Instructional Management (tailoring & delivery)
- Evaluation tools and methods (effect size)

Benefits

- Collaborative work with CAIS partners
- Shared data, technology, and activities related to the Learning in Intelligent Tutoring Environments (LTE) Laboratory
- Facilitation in formalizing collaborative relationships defining intellectual property issues
- Participation in strategic and technical discussion through targeted workshops and open formats
- Opportunity to significantly impact the technical projects and management of the CAIS

Next Steps...

ARL

- **GIFTSym6 will be expanded to three days**
 - **Presentations and Demonstrations of GIFT capabilities**
- **GIFTSym6 Program Committee will be expanded beyond ARL**
 - **Interested in serving... contact Bob Sottolare**
- **ARL Post Doctoral Fellow at USMA**
 - **Part of the ARL-USMA Simulation & Training Cell**
 - **Focus on accelerated learning through adaptive instruction research**
- **CAIS organizational structure will be formalized**
 - **ARL and external participants will elect board members (government, academia, industry, international) in 2018**
 - **CAIS will become responsible for GIFTSym in 2018**
